R.A.I.L. Video

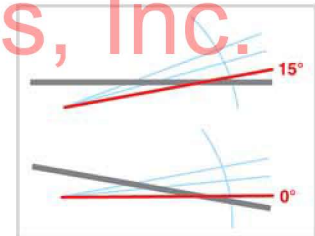

**JERR-DAN'S EXCLUSIVE REAR AWARENESS INDICATOR LIGHTS**

# Eastern Wrecker Sales, Inc.

Be powerfully present with R.A.I.L.™, Jerr-Dan's exclusive Rear Awareness Indicator Lights.\* Bright amber LED strobe technology commands attention whether you're working through dark, foggy, rainy, or high-traffic conditions. Flashing lights project horizontally for increased rear visibility, especially when the deck is tilted for loading and unloading. So you can work with confidence.

- Bright amber LED strobe technology flashes in random patterns for increased attention
- Side-mounted system virtually eliminates potential blockage by deck payloads
- 15 degree upward angular placement optimizes horizontal visibility for oncoming traffic while the deck is tilted
- Positioned rearward of the controls to minimize distraction for the operator
- Robust, corrosion resistant mounting bracket provides unparalleled durability
- Industrial grade adhesive and grommet mounting for easier aftermarket installation in existing marker light holes
- Integrated LED Side Marker Lights

15 degree angular placement increases horizontal visibility while deck is tilted

Side-mounting helps to minimize potential blockage from payloads
