

MULTI PRODUCT CONTAINER & CAR TRAILERS

BUILT FOR POWER

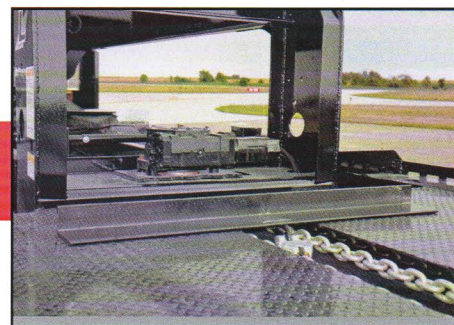

The chain-drive system is very important when power is needed. The Landoll 20,000 lb. capacity gear box is built to deliver force, it's a continuous $\frac{1}{2}$ " T70 chain. This perfect combination of power and strength gives the confidence to load and unload all types of containers, with or without contents.

CENTRALIZED LUBE

PROTECT YOUR INVESTMENT

Landoll has introduced the centralized grease system with one thought in mind "Make it Easy to Take Care of". Taking care of equipment means one thing, **LESS DOWN TIME**. Landoll has conveniently located the central grease bank on the undercarriage at the rear bumper. Within minutes, up to 16 lubrication points are serviced (on a two axle); including slack adjusters and "S" cams. It doesn't get easier. You save labor (money) every time you service your trailer.

PUSH BAR

The Landoll all new PUSH-BAR is lighter weight but stronger. The formed bar is made from $\frac{3}{8}$ " 80,000 PSI plate, laser cut and formed into the angle needed to push even the heaviest of boxes. During redesign, Landoll engineers used a laser torch to strategically place holes to increase the flat base surface and to remove unneeded weight, a win - win.

LANDOLL TRAILERS
